Rare, notable and other taxa not included overleaf

Name	Locality and precise date (if not given above)	Habitat	Other info (e.g. m, f, det., population size)

Nomenclature follows Blockeel et al. (2021), *A new checklist of the bryophytes of Britain and Ireland, 2020*. With some additional updates to 2024.

* denotes aggregate species, with brackets for those recently recognised as such (i.e. sensu Smith 2004) where the s.str may not yet be in common use, but requires consideration; names of subspecies and varieties are underlined. See aggregate definitions spreadsheet on the BBS website.

Mark additional information for taxa by adding the relevant capitalised letter after the name - Chk Fruit Male fFemale Bulbils Gemmae Tubers

The information on this card, including name(s) of recorders and experts, is contributed to the BBS or BRC on the understanding that the data will be entered into a computerised database and may be passed to third parties for use in nature conservation, research, education and public information. The information remains the property of the recorder or the recorder's employer.
